PROFESSIONAL SUMMARY

Software Developer at Rigelis Inc. building backend-focused full-stack products, internal tools, and healthcare/operations systems. Experienced with Django/DRF, Node.js, React, PostgreSQL, authentication, RBAC, API integration, debugging, and deployment support. Recent work includes hospital inventory and ordering workflows, a staged multi-tenant asset platform, open-source mapping tooling, and desktop finance software; brings cybersecurity awareness to access control, data handling, and reliability.

TECHNICAL SKILLS

Backend:	Python, Django, Django REST Framework, Node.js, REST APIs, Celery, Redis
Frontend:	React, TypeScript, Nuxt, Tailwind, Django Templates, responsive UI
Data & Cloud:	PostgreSQL, MySQL, SQLite, Firebase, Cloudinary, database modelling
Security & Quality:	Authentication, RBAC, access control, API testing, debugging, data privacy
Tools & Workflow:	Git, GitHub, Linux/Bash, Postman/Swagger, Vite, Docker basics, deployment support
Core Strengths:	Technical documentation, testing support, user support, product thinking, AI-assisted development

PROFESSIONAL EXPERIENCE

Software Developer - Rigelis Inc.	Sep 2024 - Present
- Build and improve web applications, backend features, REST APIs, and internal tools for operational and healthcare workflows. - Contribute to UGMC-Canteen / Mayrit Cuisines, supporting inventory, ordering, ward-user flows, dashboards, uploads/imports, and reporting needs. - Developed and staged AssetTrack Pro, a multi-tenant platform for asset registration, QR tracking, transfers, maintenance, repairs, consumables, RBAC, audit logs, and reporting. - Authored and maintained the PMAG Day 2026 event site, refining sponsor tiers, board-member content, event resources, branding assets, favicon, and brochure presentation. - Work across databases, authentication, permissions, UI integration, troubleshooting, documentation, testing support, and deployment workflows to improve product reliability. - Support demonstrations and users by translating real product issues into maintainable software improvements while applying cybersecurity awareness to access control and data handling.	
Laboratory Intern - Liberty Medical Laboratory Services	Oct 2022 - Dec 2022
- Maintained accurate digital records with attention to confidentiality, documentation quality, compliance, and structured data handling. - Supported laboratory processes in a healthcare environment, strengthening attention to detail, privacy, and operational discipline.	

SELECTED PROJECTS

AssetTrack Pro - Multi-Tenant Asset, Maintenance and QR Tracking Platform

- Developed and staged a multi-tenant asset platform covering registration, QR workflows, transfers, maintenance, repairs, consumables, roles, audit trails, and reporting.
- Defined the ERD, backend-first modules, permissions, API workflows, and implementation roadmap for a Django/DRF and PostgreSQL system with React, Celery, and Redis.

Tech: Django/DRF, PostgreSQL, React, Celery, Redis, QR workflows, RBAC

MarianSave - Offline-First Desktop Personal Finance Tracker

- Built a local-first desktop finance tracker with transaction entry, categories, dashboard summaries, date-range reports, and CSV export.
- Implemented the product around Tauri, React, TypeScript, SQLite, React Hook Form, Zod, Recharts, Vite, and Tailwind for private local data storage.

Tech: Tauri, React, TypeScript, SQLite, React Hook Form, Zod, Recharts, Vite, Tailwind

StudyHub API - Collaborative Study Group and Resource Finder

- Built a backend-focused platform connecting authenticated users by academic interests, subjects, groups, memberships, and shared resources.
- Implemented profile logic, group creation, role-based permissions, subject filtering, resource uploads/links, and structured REST endpoints.

Tech: Django, Django REST Framework, PostgreSQL

Navigatr - Open-Source Mapping SDK

- Developed an open-source mapping direction with routing, geocoding, walking/driving/biking support, MapLibre rendering, ETA, and real-time tracking workflows.
- Structured the work as TypeScript packages for core routing/geocoding and browser mapping, using open public infrastructure instead of paid map APIs.

Tech: TypeScript, MapLibre, Valhalla, Nominatim, Photon, open mapping APIs

HiveMinds - Role-Based Learning and Payment Platform

- Built a role-based learning platform with student, teacher, parent, and admin dashboards, protected routes, session workflows, course views, and payment flows.
- Integrated React, Firebase Auth/Firestore/Functions/Storage, Framer Motion, React Hot Toast, and Paystack Inline across the application workflow.

Additional Web Projects - MedsGH, InnerPieces, Domemily and newportfolio

- Built and improved Django/React products including e-pharmacy support, a content platform with CRUD, uploads, caching, indexes, Cloudinary, and deployment preparation, plus a modern portfolio with a server-side Spotify widget.

Tech: Django, DRF, React, TypeScript, Firebase, PostgreSQL, Cloudinary, Vite, Tailwind, Framer Motion, EmailJS

EDUCATION

BSc Biological Sciences (Biochemistry & Plant Biology) - University of Ghana

Jan 2021 - Aug 2024

CERTIFICATIONS

- ALX Software Engineering Program - Python Backend Development
- ALX Cybersecurity Program
- ALX Professional Foundations

LANGUAGES

English - Expert | Twi - Expert | French - Intermediate
