

DOMINIC QUAINOO AMUAH

Software Developer | Backend-Focused Full-Stack Developer | Accra, Ghana
+233 55 600 7486 | dominicquainoo62@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Developer at Rigelis Inc. with hands-on experience building, maintaining, and improving web applications, REST APIs, internal software tools, and operational systems. Backend-focused with practical strength in Python, Django, Django REST Framework, Node.js, React, databases, authentication, permissions, API integration, debugging, documentation, testing support, and deployment workflows. Applies a cybersecurity background to day-to-day development by considering secure authentication, access control, data privacy, safer user workflows, input handling, and basic backend security while building systems for healthcare, inventory, ordering, asset tracking, and location-based use cases.

TECHNICAL SKILLS

Backend:	Python, Django, Django REST Framework, Node.js, REST API design, authentication, permissions, business logic
Frontend:	React, Nuxt, Django Templates, responsive UI implementation, frontend-backend integration
Databases:	PostgreSQL, MySQL, SQLite, database modelling, relational data structures, query debugging
Cybersecurity:	ALX Cybersecurity background, access control, authentication flows, data privacy awareness, secure backend practices
Tools & Workflow:	Git, GitHub, VS Code, Linux/Bash, Postman/Swagger, API integration, deployment platforms, Docker basics
Core Strengths:	Debugging, technical documentation, testing support, product thinking, AI-assisted development, user support

PROFESSIONAL EXPERIENCE

Software Developer - Rigelis Inc.	Sep 2024 - Present
- Build, support, and improve web applications, backend features, and internal software tools used in real operational and healthcare-related workflows. - Work across APIs, databases, authentication, permissions, business logic, user interfaces, and frontend-backend integration to solve practical product issues. - Apply cybersecurity awareness in development by paying attention to access control, safer authentication flows, user permissions, data handling, and privacy-sensitive system behaviour. - Contribute to Rigelis GitHub organisation work including UGMC-Canteen, supporting inventory, ordering, ward-user flows, dashboard visibility, and operational reporting needs. - Troubleshoot API, database, UI, deployment, and workflow issues, then document fixes, support testing, and help improve product reliability before and after release. - Assist with technical demonstrations, feature validation, user support, and translating real user problems into maintainable software improvements.	
Laboratory Intern - Liberty Medical Laboratory Services	Oct 2022 - Dec 2022
- Maintained accurate digital records with attention to compliance, confidentiality, documentation quality, and structured data handling. - Supported laboratory processes in a healthcare environment, strengthening attention to detail, privacy, and operational discipline.	

SELECTED PROJECTS

UGMC-Canteen / Mayrit Cuisines - Hospital Inventory and Food Ordering System

- Worked on a hospital-focused ordering and stores workflow supporting ward users, patient meal ordering, stock handling, kitchen visibility, and admin reporting.
- Supported role-based access, operational dashboards, upload/import flows, and practical improvements for real users in a healthcare setting.

Tech: React / Node or web stack support, GitHub organisation collaboration, inventory and ordering workflows

AssetTrack Pro - Asset, Maintenance, Repairs and QR Tracking Platform

- Designed and planned a full asset tracking system covering asset records, QR-code scanning, maintenance, repairs, toner tracking, stores, roles, and reporting.
- Defined module requirements, backend-first flows, data structures, access permissions, and implementation guidance for scalable MVP development.

Tech: Node.js / Django planning, React, database design, QR-code workflows, RBAC

StudyHub API - Collaborative Study Group and Resource Finder

- Built a backend-focused platform connecting authenticated users by academic interests, subjects, groups, memberships, and shared resources.
- Implemented profile logic, group creation, role-based permissions, filtering, and structured REST API endpoints.

Tech: Django, Django REST Framework, PostgreSQL

Navigatr - Open-Source Mapping SDK

- Contributed to a mapping SDK direction for location-based applications, routing, geocoding, ETA, and real-time tracking workflows.
- Supported a product idea aimed at reducing dependency on paid map APIs through open public infrastructure.

Tech: TypeScript, MapLibre, routing and geocoding APIs

MedsGH E-Pharmacy Platform - Healthcare Web Platform Support

- Contributed to e-pharmacy platform support with focus on web functionality, backend support, system testing, and healthcare-related user workflows.

Tech: Web application support, backend troubleshooting, healthcare systems

Additional Web Projects - Portfolio, InnerPieces, Domemily Fashion, Reflect Blog

- Built and contributed to responsive web applications covering portfolio presentation, content management, image upload, authentication, and brand-focused interfaces.

Tech: Django, React, Firebase, frontend-backend integration

EDUCATION

BSc Biological Sciences (Biochemistry & Plant Biology) - University of Ghana

Jan 2021 - Aug 2024

CERTIFICATIONS

- ALX Software Engineering Program - Python Backend Development
- ALX Cybersecurity Program
- ALX Professional Foundations
